## CHEST LIGHT ARCTURUS

### INSTRUCTIONS

Please read these instructions carefully before use. To avoid damage to the product and to prevent eye injury, the light should be used according to the following guidelines.

**BUY NOW**

**Important!** Your light has a lithium polymer-type battery, which drains when the light is left on the bright setting and does not dim until the power is nearly exhausted. When the light begins to dim and the charge level indicates one light, the battery is almost fully drained and you should turn off the unit. **Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it before storage to prevent deep discharge of the battery.**

## SAFETY INSTRUCTIONS

Small parts present a choking hazard. Keep in a safe place, out of the reach of small children. The product is not suitable for children under 6 years of age.

- Avoid exposure to solvents and/or vapors.
- Avoid prolonged exposure to strong vibrations.
- Do not use in areas where flammable gases may be present.
- When running or walking in traffic, direct the light downwards so that it does not blind oncoming drivers or other road users.
- Do not look directly at the light. Do not point the light at humans' or animals' faces.
- The front LED unit may become hot during use. To avoid overheating, do not cover the light.
- The product should not be used for eye examinations (e.g., a pupil test). This can cause permanent damage to the eyes.

## HANDLING AND USE OF THE CHEST LIGHT

- Handle the product carefully. Do not pull on the cords unnecessarily.
- The front light unit is designed to separate from its base, should it catch on clothing or objects. If so, simply reattach it.
- If you plan to not use the product for an extended period of time, charge the battery before storing it. The battery level drops by about 5% per month when not in use.

- For optimal use and lifespan, use the product only in a temperature range of -4° to 140° F and do not expose it to direct heat or constant sunlight.

## MAINTENANCE AND REPAIR

- Do not attempt to modify or repair the product. In the event of a malfunction, please contact our customer service via Amazon messages. We will be happy to help you.
- Do not expose the rechargeable battery to temperatures above 140° F (such as in direct sunlight) or store it near open flames.
- Dispose of or recycle the product according to local regulations.
- Do not use cleaning agents that can damage the product. Clean the light with a soft cloth to avoid scratching the lens.

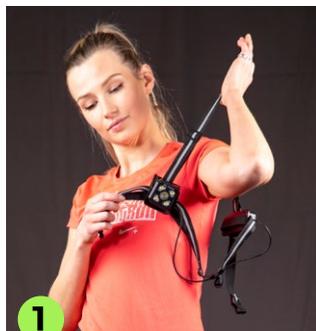

## TECHNICAL INFORMATION:

- 80-CRI rated LEDs, 900 lumens
- Operating time: 3h on full power (frost may shorten battery life)
- Dust and water resistance: IP44 (protected from dust and rain)
- BATTERY: Li-Polymer 2500mAh also serves as power bank (USB)
- Weight: 160g
- Warranty: 1 year

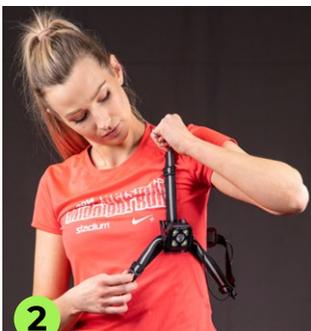

**BUY NOW**

# CUBE X CHEST LIGHT ARCTURUS

## HOW TO PUT ON AND USE:

**1** Slide your left arm through the straps.

**2** Place the vertical strap over your left shoulder.

**3** Connect the clip on your right side.

**4** Adjust the straps for comfort but tight enough to prevent bouncing.

**5** Switch the light on. There are three modes: flood mode, beam mode, and flood+beam.

**6** Adjust the beam angle as desired.

**Charging** The battery is charged at the factory and the light is shipped ready to use. To recharge after use, connect the USB cable (included) to the charging socket, then connect the other end to a suitable USB power supply (e.g., a phone charger or a computer).

**Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!**

**DOUBLES AS EMERGENCY POWER BANK**  
- Recharge the light via the USB-C port and charge your phone via USB.

### Operation Of The Light

1st press of the power button: floodlight on (battery life approx. 5h). 2nd press: beam light on, (battery life approx. 5h). 3rd press: flood and beam light on (battery life approx. 2,5h). 4th press: light off.

### Adjusting the beam angle

Adjust the beam to a height that suits you, according to your speed. Mind others in traffic: remember not to aim the beam too high.

## LED REFLECTIVE VEST

### INSTRUCTIONS

Please read these instructions carefully before use. To avoid damage to the product and to prevent eye injury, the light should be used according to the following guidelines.

Front

Back

**BUY NOW**

# PENT X LED REFLECTIVE VEST

## HOW TO PUT ON

This product fits to people with waist sizes 23.6" - 38".

**1** Open both buckles in front of the vest

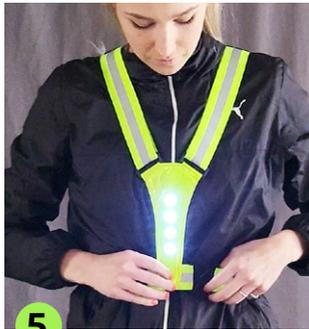

**2** Put the vest on so that the front lights are in front and the back lights in the back

**3** Bring the buckles from the back to the front

**4** Close both buckles in front and adjust the belts so, that the vest fits comfortably and doesn't bounce when you move

**5** Press the power button in front to switch the front light on

**6** Press the power button in the back to switch the red back light on

## OPERATION

The front lights are turned on by pressing the power button in the front, and the rear lights are turned on by pressing the power button in the back.

Press the button once to turn the light on; it is now in "quick flash" mode. Press it again to change to "slow flash." Click it a third time to change to "on." Press it a fourth time to turn the unit off. A fully charged battery provides 3-5 hours of light.

# PENT X LED REFLECTIVE VEST

## CHARGING

The battery is charged at the factory and the light is shipped ready to use.

To recharge, connect the USB-C cable (included) to the charging socket. There's one on both front and the back side. **Both need to be charged separately.**

Then connect the other end to a suitable USB power supply (e.g., a phone charger or computer). **Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!** The battery needs 1-2 hours to recharge completely.

\*Charging socket

**Important!** do not leave the light on unattended! Your light has a lithium polymer-type battery. The light remains bright and does not dim until the power is almost exhausted. When the beam begins to dim and the charge level indicates only one light, the battery is almost exhausted. Turn off the light to prevent deep battery discharge.

**Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it fully before storage to prevent deep discharge.**

# QUINT X

---

## CLIP-ON LIGHT ELITE

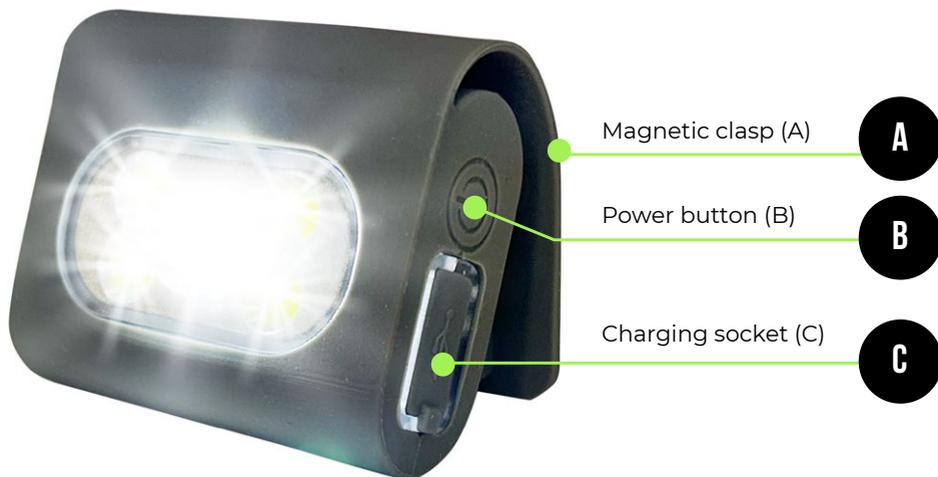

### INSTRUCTIONS

Please read these instructions carefully before use. To avoid damage to the product and to prevent eye injury, the light should be used according to the following guidelines.

**BUY NOW**

# QUINTX CLIP-ON LIGHT ELITE

## OPEN THE CLASP

Open the clasp (A) and clip the light to your pocket, shirt collar, the waist of your shorts or pants, or to a reflective vest. Note! For the magnet to attach properly, the attachment point must be a thin fabric. Once you have attached the light, shake it to ensure that the attachment point is secure and the light does not come off. The light can be attached to any magnetic metal to use as a convenient task light.

## USING THE POWER BUTTON

**Press the power button** to turn on the beam light at 100% power (battery life approx. 3h).

**Press the power button again** for 70% power (battery life approx. 4h).

**Press the power button a third time** for Beam Strobe Light.

**Press the power button a fourth time** to turn the light off.

## CHARGING

The battery is charged at the factory and the light comes ready to use. Open the protective cover and connect the supplied USB-C cable to the charging socket (C), then connect the other end to a suitable USB-C power supply, such as a phone charger or computer. **Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!**

## USING THE FLOOD LIGHT

**Double-click** the power button to turn on the flood light at 100% power (battery life approx. 3h).

**Press the power button once** after activating the flood light for 70% power (battery life approx. 4h).

**Press the power button a third time** to turn the flood light off.

**Important!** Your light has a lithium polymer-type battery, which drains when the light is left on the bright setting and does not dim until the power is nearly exhausted. When the light begins to dim, the battery is almost fully drained and you should turn off the unit. Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it before storage to prevent deep discharge of the battery.

## SAFETY INSTRUCTIONS

Small parts present a choking hazard. Keep in a safe place, out of the reach of small children. The product is not suitable for children under 6 years of age. Use the product only in a temperature range of -20 to 60° C and do not expose it to direct heat or constant sunlight.

- Avoid exposure to solvents and/or vapors.
- Avoid prolonged exposure to strong vibrations
- Do not use in areas where flammable gases may be present.
- Do not look directly at the light. Do not point the light at humans' or animals' faces.
- The front LED unit may become hot during use. To avoid overheating, do not cover the light.
- The product should not be used for eye examinations (e.g., a pupil test). This can cause permanent damage to the eyes.

## HANDLING AND USE OF THE CLIP-ON LIGHT ELITE

- Handle the product carefully.
- If you plan to not use the product for an extended period of time, charge the battery before storing it. The battery level drops by about 5% per month when not in use.
- For optimal use and lifespan, use the product only in a temperature range of -4° to 140° F and do not expose it to direct heat or constant sunlight.

## MAINTENANCE AND REPAIR

- Do not attempt to modify or repair the product. In the event of a malfunction, please contact our customer service via Amazon messages. We will be happy to help you.
- Do not expose the rechargeable battery to temperatures above 140° F (such as in direct sunlight) or store it near open flames.
- Dispose of or recycle the product according to local regulations.
- Do not use cleaning agents that can damage the product. Clean the light with a soft cloth to avoid scratching the lens.

## LIGHT BELT

### INSTRUCTIONS

Please read these instructions carefully before use. To avoid damage to the product and to prevent eye injury, the light should be used according to the following guidelines.

#### HOW TO WEAR:

The belt is designed to fit adults from size XS to XL, and the straps are elastic for maximum comfort. First, find the most comfortable place on your waist for the pouch to sit and adjust the belt until it sits snugly. When properly adjusted, the belt should not bounce as you move.

# GO X1 LIGHT BELT

## OPERATION

Press the button once to turn the light on; it is now in “quick flash” mode. Press it again to change to “slow flash.” Click it a third time to change to “glow.” Press it a fourth time to turn the unit off. A fully charged battery provides 52 hours of light in glow mode.

## VISIBILITY AT NIGHT

The Light Belt is visible up to a distance of 460 feet.

## POUCH POCKET

The zippered pouch is made from water-resistant material. You can use it for carrying essentials such as a phone, keys, and cash and cards, even in rainy conditions.

## CHARGING

The battery is charged at the factory and the light is shipped ready to use. To recharge, connect the USB cable (included) to the charging socket, then connect the other end to a suitable USB power supply (e.g., a phone charger or computer). **Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!** The battery needs 70 minutes to recharge completely.

\*Charging socket

**Important!** do not leave the light on unattended! Your light has a lithium polymer-type battery. The light remains bright and does not dim until the power is almost exhausted. When the beam begins to dim and the charge level indicates only one light, the battery is almost exhausted. Turn off the light to prevent deep battery discharge.

**Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it fully before storage to prevent deep discharge.**

## SAFETY INSTRUCTIONS

Small parts present a choking hazard. Keep in a safe place, out of the reach of small children. The product is not suitable for children under 6 years of age.

- Avoid exposure to solvents and/or vapors.
- Avoid prolonged exposure to strong vibrations.
- Do not use in areas where flammable gases may be present.
- When running or walking in traffic, direct the light downwards so that it does not blind oncoming drivers or other road users.
- Do not look directly at the light. Do not point the light at humans' or animals' faces.
- The front LED unit may become hot during use. To avoid overheating, do not cover the light.
- The product should not be used for eye examinations (e.g., a pupil test). This can cause permanent damage to the eyes.

## HANDLING AND USE OF THE CHEST LIGHT CLASSIC

- Handle the product carefully. Do not pull on the cords unnecessarily.
- If you plan to not use the product for an extended period of time, charge the battery before storing it. The battery level drops by about 5% per month when not in use.
- For optimal use and lifespan, use the product only in a temperature range of  $-4^{\circ}$  to  $140^{\circ}$  F and do not expose it to direct heat or constant sunlight.

## MAINTENANCE AND REPAIR

- Do not attempt to modify or repair the product. In the event of a malfunction, please contact our customer service via Amazon messages. We will be happy to help you.
- Do not expose the rechargeable battery to temperatures above  $140^{\circ}$  F (such as in direct sunlight) or store it near open flames.
- Dispose of or recycle the product according to local regulations.
- Do not use cleaning agents that can damage the product. Clean the light with a soft cloth to avoid scratching the lens.

# CHEST LIGHT CLASSIC

## HOW TO PUT ON AND USE:

Images are of Chest Light PRO - the same instructions apply to the Classic as well.

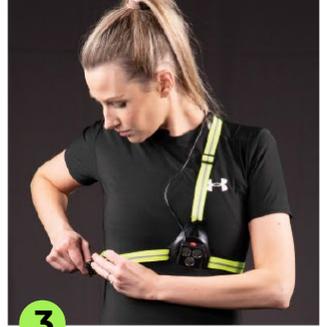

1

Slide your left arm through the straps.

2

Place the vertical strap over your left shoulder.

3

Connect the clip on your right side.

4

Adjust the straps for comfort but tight enough to prevent bouncing.

5

Switch the light on. There are two modes: 100% (500 lumens) and 50% (250 lumens).

### Charging

The battery is charged at the factory and the light is shipped ready to use. To recharge after use, connect the USB cable (included) to the charging socket, then connect the other end to a suitable USB power supply (e.g., a phone charger or a computer). **Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!**

\*charging socket

### OPERATION OF THE LIGHT

First press of the power button: light on, 100% power (battery life approx. 3h). Second press: light on, 50% power (battery life approx. 4h). Third press: light off.

### Adjusting the beam angle

Adjust the beam to a height that suits you, according to your speed. Mind others in traffic: remember not to aim the beam too high.

For the magnet to attach properly, the attachment point must be a thin fabric. Once you have attached the light, shake it to ensure that the attachment point is secure and the light does not come off. The light can be attached to any magnetic metal to use as a convenient task light.

## POWER BUTTON

One-touch – light on, 100% power (battery life approx. 3h)  
Second press – light on, 70% power (battery life approx. 4h)  
Third press – light on, 50% power (battery life approx. 5h)  
Fourth press – SOS indicator  
Fifth press – light off

## CHARGING

The battery is charged at the factory and the light comes ready to use. Open the protective cover and connect the supplied USB-C cable to the charging socket (C), then connect the other end to a suitable USB-C power supply, such as a phone charger or computer. **Use a 10W powered adapter, avoid high-power chargers, which may damage the battery!**

# CLIP-ON LIGHT PRO

---

**Important!** Your light has a lithium polymer-type battery, which drains when the light is left on the bright setting and does not dim until the power is nearly exhausted. When the light begins to dim and the charge level indicates one light, the battery is almost fully drained and you should turn off the unit. **Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it before storage to prevent deep discharge of the battery.**

## SAFETY INSTRUCTIONS

Small parts present a choking hazard. Keep in a safe place, out of the reach of small children. The product is not suitable for children under 6 years of age. Use the product only in a temperature range of -20 to 60° C and do not expose it to direct heat or constant sunlight.

- Avoid exposure to solvents and/or vapors.
- Avoid prolonged exposure to strong vibrations
- Do not use in areas where flammable gases may be present.
- Do not look directly at the light. Do not point the light at humans' or animals' faces.
- The front LED unit may become hot during use. To avoid overheating, do not cover the light.
- The product should not be used for eye examinations (e.g., a pupil test). This can cause permanent damage to the eyes.

## HANDLING AND USE OF THE CLIP-ON LIGHT PRO

- Handle the product carefully.
- If you plan to not use the product for an extended period of time, charge the battery before storing it. The battery level drops by about 5% per month when not in use.
- For optimal use and lifespan, use the product only in a temperature range of -4° to 140° F and do not expose it to direct heat or constant sunlight.

## MAINTENANCE AND REPAIR

- Do not attempt to modify or repair the product. In the event of a malfunction, please contact our customer service via Amazon messages. We will be happy to help you.
- Do not expose the rechargeable battery to temperatures above 140° F (such as in direct sunlight) or store it near open flames.
- Dispose of or recycle the product according to local regulations.
- Do not use cleaning agents that can damage the product. Clean the light with a soft cloth to avoid scratching the lens.

## TECHNICAL INFORMATION:

- Lumens: 300 / 200 / 150
- Operating time: 3h / 4h / 5h (frost may shorten battery life)
- Dust and water resistance: IP55 (protected from dust and rain)
- BATTERY: Li-Polymer 450mAh
- LED: 10w
- Weight: 60g
- Warranty: 1 year
